

Safety

Summary/Purpose: Safety regulations must be enforced, observed and unsafe conditions and practices should be reported. Included is an explanation of how Worker's Compensation is provided for those who are injured while on duty.

Safety regulations along with all other precautions normally expected must be enforced by alert supervision. However, all employees can do much to make a campus a better place to work by observing safety regulations and reporting unsafe conditions and practices. Workers' Compensation is provided for those who are injured while on duty. Although the prevention of injury and the loss of property are first considerations, emphasis may also be given to the fact that Workers' Compensation premiums are calculated on the basis of injuries anticipated and subsequently adjusted by an "experience factor," which reflects the frequency and severity of accidents over a period of time.
